DETAILED ACTION

Claims 1-34 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 35-44, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement as set forth in the Office action mailed on October 18, 2005 is hereby withdrawn. In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claims including all the limitations of an allowable product claim or rejoined process claim are presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Pamela A. Mingo (48,256) on February 13, 2006.

The application has been amended as follows:

In claim 16, a period is inserted at the end of the claim.

In claim 24, a period is inserted at the end of the claim.

In claim 25, the numeral 5 at the end of the claim is deleted and replaced with a period.

In claim 26, a period is inserted at the end of the claim.

Claim 45-56 are cancelled

The following is an examiner's statement of reasons for allowance: Macrocyclic peptide active against HCV are known in the art. The closest prior art to the instantly claimed invention is WO 00/59929 where quinoline is used but isoquinoline is used in the instantly claimed compounds. No prior art or teaching suggests the use of isoquinoline in the instantly claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
